Where does PGE get the renewable power?

Power for the Green Source option comes from 100 percent new renewable energy sources. In 2010, these sources included new wind, new biomass (wood waste), new geothermal and new low impact hydropower. Clean Wind and Green Source are generated from 100 percent new sources located in the Western Electricity Coordinating Council region.

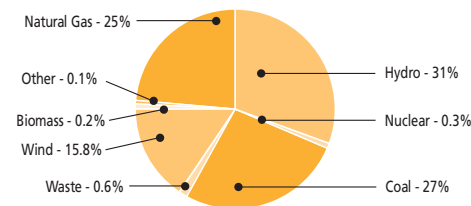

Oregon Resource Mix

Green Source

Clean Wind*

Source: Oregon Department of Energy, 2009 data for Green Source and Clean Wind. Data for PGE System Mix may differ from Oregon's Resource Mix; check PortlandGeneral.com for details. All percentages are approximate. "New" refers to power generated from facilities that became operational after July 1999.

*Based on a customer's monthly usage of 1,648 kWh and the purchase of one unit.

Pricing information

Estimated additional monthly cost*

Consumption level (kWh)	1,500	3,000	4,500
Green Source All of your energy use matched with 100% renewable power.	\$18	\$36	\$54
Clean Wind A 200 kWh unit of 100% new wind sold for a set fee.	\$3.50	\$3.50	\$3.50

Reduce your environmental impact

The average renewable power customer using 1,648 kWh monthly can offset more than 17,842 lbs of CO₂ per year, which is the same as 19,825 miles or planting more than 26 trees annually.

Note: Your chosen option will show up as a line item on your PGE bill once your enrollment form has been processed and your next meter read date has occurred.

* Extra monthly costs as compared to PGE's Basic Service rate as of December, 2008. Please check our Web site for the latest pricing information. Clean Wind figures assumes one unit of Clean Wind purchased. Your percentage or monthly cost may vary.

Please visit our renewable energy calculator at GreenPowerOregon.com for examples of monthly bills at other usage levels.

Costs shown for Green Source and Clean Wind are for the extra renewable energy portion of a bill added to your existing Basic Service or Time of Use rate. It does not include the energy rate charge (Basic Service or Time of Use) and other charges or fees assessed to every PGE customer.

Green ideas online

Introducing a new Web site for the PGE green community: GreenPowerOregon.com. Find detailed information on renewable energy and sustainability, exclusive coupons for PGE renewable power customers, a listing on the online directory of local green businesses, a carbon footprint calculator, a sustainable events calendar and much more. Visit our site today!

Frequently asked questions about renewable power.

Q: Why are there special programs for renewable energy? Why isn't it just provided to everyone?

A: While the price gap between renewable energy and conventional generation is narrowing, renewables are still more expensive than Basic Service power. PGE is supporting more wind projects all the time, and customer participation supports bringing additional renewables on-line. Oregon Senate Bill 1149, passed in 1999, requires us to offer three renewable options.

Q: Is there a governing body that oversees PGE's renewable power transactions?

A: Yes. The Oregon Public Utility Commission (OPUC) approved all of our renewable power options. Prior to approval, PGE was required to submit a full description of these programs, including fund allocations. PGE submits annual reports on program administration and marketing for these programs, which are on file with the OPUC. PGE does not profit from the sale of these renewable energy options.

Q: Who is Green Mountain Energy Company?

A: Green Mountain Energy Company (www.greenmountain.com) was selected in a competitive process to help PGE offer renewable products through 2012.

Portland General Electric

The power to make a difference.

Do you want your company to help build a sustainable energy future in Oregon? Buying cleaner, renewable energy is one of the most important steps you can take. Almost 77,000 customers have made the move to PGE's renewable power program, and it now ranks second in the nation for all customer classes. Show your customers and employees that your business is doing its part for the environment by joining this growing community and showing your support for cleaner energy in Oregon.

Why buy renewable power for your business?

Environmental benefits — Purchasing renewable energy minimizes the impact your company has on the environment. You'll help support wind farms in the Northwest and encourage the development of new, local renewable energy sources.

Promotional benefits — Publicize your support and civic leadership to your community. Your demonstrated commitment can attract and retain customers, employees, vendors and other partners. When given the choice, customers prefer to patronize like-minded businesses.

Tools — Upon enrollment you will receive a number of tools to promote your commitment, including:

- Renewable energy decals for your windows and doors
- Access to an online tool kit at GreenPowerOregon.com that contains photos, messages and web graphics you can use to create additional promotional materials.

What other businesses are saying

"We are proud to be part of the PGE Renewable Community and have enjoyed payback in concrete and intangible ways. Our customers appreciate our efforts."

Jeana Edelman
Co-Owner, Hot Lips Pizza

"We recognize the need to preserve and enhance our environment and we have a genuine commitment to make a difference. We grew up here, went to school here, and work here. So it's important to us that we help take care of this place. It's as simple as that."

Ed Tonkin
Ron Tonkin Family of Dealerships

"For us, sustainable practices do not stop in the vineyards. By attaining renewable power from PGE, we are able to contribute to the preservation of our community for future generations."

Barbara Gross
Cooper Mountain Winery

Easy renewable choices

Both of these options are available to residential and small business (Schedule 32) customers and are as reliable as your current service.*

Green Source is based on matching 100 percent of your actual energy use with renewable power; with Clean Wind, you purchase small units of renewable energy for a set fee. With both options your standard usage is billed at the Basic Service or Time of Use rate and you pay an additional charge for the renewable option you choose. No matter which option you select, you will continue to receive the same reliable PGE electricity service. The table below explains the features and benefits of each option.

Choose an Option	Renewable Power Sources Used	How this Option Works	Renewable Costs
Green Source All of the energy you pay for is from 100% new renewable sources.	All of your energy use matched with 100% renewable power.	100% of your monthly usage is offset with renewable resources	Your regular PGE energy rate plus an additional \$0.012 per kWh. About \$20 more for a typical PGE customer**
Clean Wind A 200 kWh unit of 100% new wind sold for a set fee.	100% renewable power from new wind	Available in 200 kWh units (each unit represents about 12% of your monthly usage**)	Your regular PGE energy rate plus an additional \$3.50 per 200 kWh unit – you can purchase as many units as you wish.

*You will not have electricity from a specific generation facility delivered directly to your business, but the amount of electricity you consume will be replaced in the Western power grid by new renewable energy.

**More per month than PGE's Basic Service rate as of March, 2011. Please check our Web site for the latest pricing information. Figures are based on a typical PGE schedule 32 small business customer's monthly electricity usage of 1,648 kWh; Clean Wind percentage assumes one unit of Clean Wind purchased. Your percentage or monthly cost may vary.

Habitat Support

Whether you choose Green Source or Clean Wind, you may also select to support stream habitat for salmon and other fish in our service territory by paying an additional \$2.50 per month, which goes directly to the Nature Conservancy. To date, Habitat Support customers helped restore more than 130 miles of stream habitat in our area.

Portland General Electric Renewable power enrollment form

I want to help build a sustainable energy future for Oregon.

Select your option and fill out the form below.

Green Source At your regular PGE rate plus an additional \$0.012/kWh.

Clean Wind At your regular PGE rate plus an additional \$3.50 monthly fee per unit.

How many units? _____ (Default = 1)

Most customers choose just one renewable option, but if you wish to boost your commitment you may combine Clean Wind and Green Source.

Habitat Support (you must first select one of the three options above) for an additional \$2.50 per month.
